

Intel-Assess

Assessment Solutions that Drive Instruction.

You've spent a lot of time and money building a formative assessment program and integrating it with instruction and intervention. Now it's time to prove it's paying off and to make any needed adjustments. Intel-Assess can help you answer some key questions regarding the effectiveness of your assessment program, including:

- ✎ Are your formative assessment efforts leading to better student performance on the STAR and CAHSEE?
- ✎ Do your intervention programs increase student achievement?
- ✎ Do you really understand what your ELLs know in math, science, and social studies or might their reading skills be lowering their scores in those subjects?
- ✎ Are your professional development efforts paying off?

The answers to these questions will enable you to focus your efforts most effectively, to provide the best support possible to your teachers, and in the end, to help drive student improvement. But answering these questions requires expertise — and resources — not available to most districts.

Intel-Assess has created strategic alliances with some of the most renowned researchers in the fields of assessment and ELL to help you get the customized research help you need.
